It says: Member accessibility not set to public I was under the impression that this was the default. I have searched for hours and tried different variations of the interface with no luck. What am I missing? Edit: I am running VS 2010. My web.config has the following: A: the DTO generator only generate the service client, not the APIs. The classes generated are the same as the DTOs with the exception they are internal. You can look at the code or view the source of the generated libraries in the NuGet package explorer. Alternatively you can also manually generate the API assembly using the DTO generator
