When Playstation showed off the 4 earlier this year, a few fan-made videos of the console popped up; and it was pretty exciting that if you put in the discs, you got a console and a game that was as big as the previous generation. Today, Playstation has revealed what the next generation gamepad will look like and they've even given it an official name: the Playstation 4 Pro. The new controller will have the added functionality that allows for 4k HD movies on a bigger screen. It also has a new touchpad for selecting games and a DualShock 4 controller and 4K blu-ray player are included as standard. No word on when the pro will be released. Vote in our poll here.In recent years, printer technology that manufactures multiple print products simultaneously by operating in an appropriate manner in accordance with job attributes has been developed. In a case in which, for example, a single cutter performs a printing operation with respect to multiple jobs to be recorded on a single label sheet, there are cases in which the rotational positions of the multiple print units are adjusted by using a sensor. In this type of printer, if adjustment of the rotational positions is not performed appropriately, the amounts of displacement will increase between the print products to be recorded on the same label sheet. Consequently, as the multi-print technology becomes more popular, it is conceivable that the amount of displacement can be limited by adjusting the rotational positions appropriately. However, if the rotational positions of the print units are adjusted by sensor, it will be
