Keep the.exe file safe, and if you want to run it, double click on the.exe file. License: Comments and Discussions I have just received 3 files from you,thank you. But there are 2 missing. When I install Linqpad 5.1, I can not find Linqpad4. It seems LinqPad 4.1.1 and LinqPad 5.1 are not compatible with each other. This is what I have done:I downloaded the linqpad 5.1 on Friday and installed it for the first time. Then I did some testing, and got the result as seen below. After I uninstalled LINQPad 5.1, I installed LINQPad 4.1.1. I run the program again. As I expected, the result is same as what I had before. Only I got an error message:A version of this post originally appeared on LinkedIn. When I first started blogging as a journalist, I made an assumption about blogging that I know now is probably just plain wrong, but I got it wrong then, so here it is: I imagined that most of my readers were already blog regulars. It makes sense, since bloggers are known for blogging and people don't blog for the same reasons they do anything else. Maybe if I had asked the right questions, I'd have known that my assumption was wrong and that not everyone was blogging — not in the way I was — because they didn't want their day-to-day life to be put out there for anyone to see, let alone for their future boss to read. In that case, I'd have a different plan for this conversation. But I don't think that is the case, so here's how I got my blog off the ground, how I learned to blog and why blogging has become my primary way to communicate with prospects and customers. Every week I had my only regular meeting with my editor. This would typically be during editorial meetings, but I was using it as an opportunity to introduce myself to a new product or technology when I learned that Fridays were off limits to me, which was good because I was slacking off during the week. I learned that editors knew I
