Elements is Adobe's entry-level Photoshop-like program, and it's a great first tool to explore if you want to learn basic elements. Elements is covered in Chapter 9. PSD (Photoshop Document) _Photoshop Documents_ are just like the word documents that you create on a computer — a collection of edited files. You use it to edit and organize a series of file or layer images that you plan to combine in a final work. PSD images have many elements to them. The files include background information such as colors, images, logos, text, and type. They also have an arrangement of layers that you can open and close to manipulate each layer in the image individually. Each layer has several properties, including the opacity setting, which determines how transparent (or transparent) the layer is to other layers behind it. You can see layers listed on the Layers panel as well as those you create with the New Layer menu. In addition to the Layers panel, you can access several other Photoshop Tools panels that allow you to work with color, fit to page, edit the individual pixels of an image, and perform other editing tasks. In Elements, you have to save an image as a JPEG in order to make a PSD image. After you finish your work, it automatically becomes a PSD file, so you no longer have to worry about preserving your image as a JPEG to save time. If you prefer to use Photoshop, you can bring images into Photoshop and then save them as a PSD file to maintain that format. Elements also supports having multiple document pages in a single file, and it has a few cool tricks to help you work faster and easier, as well as export a work as a PDF. If you aren't familiar with it, try creating a few PDFs in Photoshop and compare the results. To save a file as a PSD or to create a new Photoshop document, first choose File⇒Save As. In the Save As dialog box, as shown in Figure 14-1, select the From Files of Type (Mac) or From Files of Type (Windows) radio button and then click OK. The Save As dialog box, where you select a file type, is shown in Figure 14-1. Photoshop Layers Panel _Layers_ can be thought of as the building blocks of images. You use them to separate one image into sections (or layers)

The Ben Carson scandal is continuing, but it would appear that it's getting worse, not better. And unless the Education Department - not the embattled housing secretary - starts aggressively investigating Carson's taxpayer-funded \$31,000 Israeli "security" system, it appears more taxpayers money will be spent of taxpayer-funded investigation. Several weeks ago, Carson's security company initiated a buzz-kill motion at the Ben Carson Show to avoid publication of an interview because of the controversy. BREAKING: @RealBencarson's security company is demanding the removal of a critical video — even though it has nothing to do with Ben. pic.twitter.com/kypP6lquvt — Washington Post (@washingtonpost) September 23, 2017 However, after a close examination of the facts, the GOP front-runner for president will likely have to step down as the education secretary because of a law that prohibits use of federal funds to pay for foreign security. But, as with many GOP political nominees before him, the Carson scandal is far from over. The latest development involves a complaint sent to the Office of Inspector General of the U.S. Department of Education by the Government Accountability Office (GAO). The complaint alleges that Carson's security company failed to properly report \$31,000 in security payments, which were made by the U.S. government. The GAO complaint, however, also indicates that the \$31,000 in security payments was not made directly by the U.S. government to the security company. Instead, the Department of Education paid the security company for the services. This means that the payments are much more likely subject to the statute prohibiting the use of federal funds to pay for foreign security systems. Even without the use of federal funds, the GAO complaint alleges that the security company's behavior was "inappropriate." The GAO recommended that the Department of Education require Carson's security company to repay the government "the money that was erroneously paid" to the company. In a statement, GAO said that the security company "failed to use its travel escorts for all U.S. government travel and only for official U.S. government business when it should have used them for their official escort duties." "Accordingly, the Department improperly paid an amount of \$31,000 to the company for travel escorts.

Michael D'Antonio is author of the new book, "Never Enough: Donald Trump and the Pursuit of Success" (St. Martin's Press). The opinions expressed in this commentary are his. View more opinion articles on CNN. (CNN) President Donald Trump loves to talk about winning, but for much of his first three years in office he was losing. For a New Yorker, his frustration at a losing streak becomes something far more grievous than if his guests had lost money. If the man has a piece of you, it is nearly impossible to claw back. As Michael D'Antonio writes in his new book, "Never Enough: Donald Trump and the Pursuit of Success," Trump's striving to achieve every success that he lands becomes almost insatiable. Trump is thrilled if he can rebrand himself on the boards of Fortune 500 companies. He relishes the plaudits and the headlines that are part of being the first businessman to enter the White House. But the second he lands on the circuit, he wants more. His response to being dismissed was, as Bill Clinton told George Stephanopoulos on ABC's "This Week" in September 2017: "It's not about me. It's about what's going on with our country." We have a President who had six months to learn that lesson -- twice in the election, and again after his victory -- but did not. Read More
